

Tagliabue Sistemi projection

Tagliabue Sistemi has brought all the fashion sense and design style of its native Milan to ISE in the form of the Visual Pro S, a mobile and compact video communication unit bristling with functions.

The 72in front-projection system comprises an LCD projector with a large diameter aspheric (non-spherical) lens and high-precision aspheric mirror technology on a white porcelain enamelled steel surface. It can be turned into a digital space through the firm's patented interactive e-Beam device.

According to the company: "Without inconvenient installation or architectural redecoration, the Visual Pro S is an integrated video projection system, interactive writing and video conference system. It transforms any room into a meeting room, training room, conference room or for communication events in any kind of business environment.

"With a single tool that is easy to move and easy to use, versatile and scalable, the Visual Pro S is designed to resolve a multitude of different business communication needs." **Stand: 11G42**
